Status of Public Participation:

We continue to work with the Community Awareness Committee (CAC) to update site activities, and meetings are conducted on a regular basis in cooperation with Harris County.

Site updates are posted on the Web sites.

R6 working with a wide range of state and local partners will schedule a community meeting in Fall to update site developments and schedules when additional site information is available.

General talking points.

Donn,

It was about the sampling plan that the PRPs are preparing now.

On other site issues, see the following from Carlos:

"This morning we mentioned to Carl the additional sampling that is needed and additional work that the Corps needs to do for the report.

We told Carl that this would push the current scheduled out and we would not have a ROD until maybe late next year. We need to have this information in the Power Point update.

**We also mentioned that we needed to have a community meeting sometime in late October or early November to present this information to the public."**

Let's discuss a plan for this community meeting & work up something so we can discuss it at the briefing for Carl/Pam which is being set up now for next Wed 9/9.

Thanks,
